Dear Sir/Madam,

Sub: Biometric devices installed – non functioning – reg.

Regarding the biometric devices installed in our institutions on 11.05.2017, I would like to bring the following for your notice and rectification and guidance:

The devices though connected with uninterrupted power supply are showing the following display and not recording biometric finger print.

1. One Device is totally turned into green screen
2. One device is initiated with only 49 faculty members.
3. Two devices are not working
4. One device is not starting at all.
5. All devices are reflecting with red status.

We have attached snapshot of all above stated installed devices.

Request you to guide us / do the needful.

Regards

Yours faithfully,

Sd/-
